EXPERIENCE

SOSE(Society Of Software Engineers) - Coordinator, National Textile University, *Oct 2023 – June 2024*

- Active involvement in the Society of Software Engineers has strengthened my technical expertise while offering hands on experience in collaborative programming, problem-solving, and modern software engineering methodologies.

EDUCATION

National Textile University, Bachelor of Science in Software Engineering (BSSE)

Sep 2023-2027

- CGPA : 3.88

Chiniot Islamia School and College, Intermediate

June 2021 - March 2023

- Percentage : 79%

Govt Girls Higher Secondary School 203RB mananwala fsd, Matric

May 2019 - June 2021

- Percentage : 98%

PROJECTS

Smart Mood based Recommendation system

May 2025

- Developed an intelligent movie recommendation system in Python that analyzes facial expressions to detect user mood and suggest personalized film choices. Integrated a recommendation engine with computer vision techniques, and enhanced user interaction through a responsive HTML/CSS front-end interface.

FlashQuiz

May 2025

- Instant document-to-quiz generator built during VibeCode Hackathon 2025. Upload study files and get auto-generated quizzes or flashcards for quick revision.

Gym Management

Jan 2025

- Designed and implemented a gym management system in C++ utilizing linked lists to manage dynamic member records. Demonstrated proficiency in core data structure operations such as insertion, deletion, searching, and traversal, simulating real-world data handling and memory management for efficient record-keeping.

Handy-Hub Toolkit

August 2024

- Handy-Hub-toolkit is a versatile Flask-based web application featuring a suite of productivity tools, including weather tracking, QR code generation, and voice processing. It provides a centralized dashboard with a clean interface for managing multiple utility services in one place

Aura Learn

March 2026

Developing Auralearn, an AI-enhanced learning management system using the MERN stack. The platform includes separate interfaces for students and instructors, enabling course creation, content management, quizzes, and assignment submissions. It also integrates AI-powered features to assist instructors with tasks such as generating quizzes, evaluating assignments, and managing course-related activities.

IntervyaAI

August 2024

- Developed IntervyaAI, a cross-platform mobile application using Flutter and Provider, integrating OpenAI API to simulate real-time, dynamic technical and behavioral mock interviews.

n8n AUTOMATION PROJECTS

Generating Reports Workflow (n8n Level 2)

- Automated weekly sales report generation by integrating Airtable, HTTP requests, Gmail, and Discord Webhooks.
- Implemented data merging, sorting, and filtering using If, Merge, and Sort nodes.
- Automated sending of region-specific sales reports as attachments via Gmail.
- Added post-processing steps using JavaScript Code nodes for message generation and logging.

Order Processing & Reporting Workflow (n8n Level 1)

- Designed automation triggered via Schedule Trigger and HTTP Request nodes to sync ERP data to Airtable.
- Implemented conditional logic (If nodes) to create new records only for “processing” orders.
- Aggregated weekly order data using Code in JavaScript and notified the team via Discord webhook.
- Achieved complete data synchronization pipeline with minimal manual intervention.

SKILLS & ADDITIONAL INFORMATION

Automation & No-Code Tools: n8n (Workflows, Webhooks, HTTP Requests, APIs, Airtable, Gmail), MERN Stack, Flutter, OpenAI SDK

Languages: Python, C++, C#, HTML, CSS, JavaScript

Databases: MySQL, Airtable, MongoDB

Other Tools: VS Code, Figma, Google Colab, Cisco,

Soft Skills: Public Speaking, Leadership, Teamwork, Analytical Thinking
